

AMENDMENTS TO THE CLAIMS:

1. (Currently Amended) A disc changer comprising:

a magazine for storing a plurality of arranged discs in a disc arrangement direction;

a magazine holder allowing insertion of the magazine from outside and accommodating the magazine inserted;

a disc carrier for carrying a selected disc from the magazine received in the magazine holder;

a transporter for transporting the disc carrier in the disc arrangement direction;

and

a disc playing section for playing the selected disc carried from the magazine,

wherein the magazine holder has a plurality of restriction members facing one surface of the magazine received in the magazine holder,

wherein the plurality of restriction members serve to restrict an insertion direction of the magazine by getting into contact with the one surface of the magazine being inserted into the magazine holder

wherein at least a number of the plurality of restriction members are located in the vicinity of a magazine insertion opening of the magazine holder to downwardly press the one surface of the magazine as the magazine is being inserted, and

wherein part of each of the plurality of the restriction members is so formed that each is narrower in a front portion than in a rear portion thereof, and has a slip-contact member at the front portion.

2. (Canceled)

3. (Original) A disc changer according to claim 1, wherein a plurality of restriction members are integrally formed with the magazine holder

4. (Canceled)

5. (Currently Amended) A disc changer according to claim 1, wherein at least part of each of the plurality of restriction members are provided in a manner such that their end portions close to the magazine insertion opening can get into contact with the one surface of the magazine being inserted into the magazine holder.
